CAM2 ULTRA OPEN GEAR 700

DESCRIPTION

CAM2 Ultra Open Gear 700 is a tacky, adhesive, high extreme pressure grease for large heavily loaded open gear sets. The extreme pressure package is so strong that it maximizes out the Timken EP test! *CAM2 Ultra Open Gear 700* is so adhesive that it is very hard to clean it off the gears for inspection. When it is sprayed on gear teeth it stays in place to provide a thick oil film in the gear contact zone.

FEATURES

SUPER ADHESIVE FOR OPEN GEARS HIGH EP
PROTECTION
REDUCES WEAR
REDUCES OPERATING TEMPERATURE EXTENDS GEAR
LIFE
